

TENECOM
SOLUTIONS

Proactive network solutions
for forward-thinking businesses

Tenecom has been providing robust and reliable network solutions since 1986. With decades of stability and experience, we've earned a reputation for reliable service and smart IT solutions designed specifically for each customer, whether small or large.

Headquartered in Toronto with a national and global reach, we provide outstanding solutions for any size business, from one office to multiple locations.

With our leading-edge solutions, our client networks are optimized and secure – without the frustration and downtime that comes with unresolved or unexpected IT issues.

REAL SOLUTIONS, PROVIDED BY REAL PEOPLE

Most of our staff have been with Tenecom for more than 10 years and have a thorough understanding of each client's needs. When a customer calls, a member of our technical staff will always answer the phone. This saves time and money, and lets our clients resolve their issues quickly and efficiently.

TIME TO SWITCH IT PROVIDERS?

We are the right fit for companies that have outgrown or are unsatisfied with their current provider. With Tenecom, clients won't get lost in the bureaucracy of a larger technology partner. We focus on businesses looking for solid, cutting edge solutions that are reliable, affordable, and monitored 24/7.

SOLUTIONS TAILORED TO YOUR BUSINESS' FUTURE

Most businesses operate with an eye toward continuous growth and prosperity. To that end, we pay close attention to how our clients envision the future of their company's technology requirements and develop the best technology solutions for our customers.

TENECOM SEISMIC – OUR CORE OFFERING

Tenecom Seismic is a comprehensive service that provides 24/7 monitoring of your network infrastructure. It provides real-time network management services, leading edge backup for servers and PC's, firewall and anti-virus monitoring, as well as many other critical IT requirements.

Seismic uses best-of-breed solutions to maximize IT availability, performance, and security around the clock. Our clients can choose some or all of these unique offerings to customize a Seismic package.
