Care coordination. Value-based care. Cloud-based software and services.

At TRIARQ Health, we’ve built a company around delivering quality through the healthcare continuum. Through an unprecedented level of personalized services in combination with expertise and passion, TRIARQ Health is a company uniquely built for healthcare’s rapid changes and evolving needs.

**Practice Services**

Patient information at your fingertips – when and where you need it most. TRIARQ Health’s fully integrated, cloud-based and certified practice services are built on an open platform and highly personalized to each individual user. This means you have critical patient information in the hands of medical practice staff where they need it most — at the point of care. The outcome is the ability to make quick decisions that can positively impact each patient’s care and treatment.

- Electronic Health Records
- Practice Management Software
- Performance Management
- Cloud-Based Integration
- Revenue Cycle Management (RCM) Services
- Patient Engagement

**Value-Based Programs**

TRIARQ Health simplifies the process for providers to participate in value-based care by offering a complete turnkey package of resources, services, and user-friendly technology needed to participate in the programs. We work closely with key provider champions in the practice and help establish incentives and build sustainable, value-based models that work for our communities. We can give you the capabilities that help you quickly and cost effectively expand upon, or even begin your own quality initiatives to prepare for increasing risk arrangements.

- Risk Mitigation and Sharing
- Data Analytics and Benchmarking
- Bundle Management
- Payer and Employer Engagement
- Patient Engagement and Care Coordination

**Communities**

Patient-centric and provider-led. When we think of the core of a care coordinated environment, it always begins with health professionals using quality as their main barometer. At TRIARQ Health we see communities at different levels and scopes, with each community using the tenants of care coordination as their compass. Our community network is focused on: improving patient outcomes, lowering healthcare costs, improving reimbursements for quality care, measuring and communicating performance, and improving the patient experience.
