

Failing to plan is planning to fail.

Do you know that 93% of companies that suffer a data loss go out of business within five years?

It's happened before. And it will happen again.

Knowing this, it's time to equip your business with a reliable data backup plan that will keep you afloat amidst a heavy flood or an alarming man-made accident. Data Backup/Business Continuity solutions from Alexssa continuously duplicate and encrypt all your critical files and keep them secure in HIPPA & PCI compliant data centers, ready to be recovered just when you need it. Our solutions ensure your business can continue its essential functions during and after a disaster strikes. And for that scary statistic from the US Bureau of Labor, why not let it be just somebody else's story?
