

the peanut™

Sweet and simple.
But it's a tough little nut!

The Peanut: Small. Small. Small.

1 Not only is The Peanut small (we mean dinky!), it's also versatile and nimble — put your laptop, device, or up to 10 lbs of equipment on the move without the fuss of an overblown cart.

2 The round handle on the 40" high shelf is comfy for your wrists to rest on.

3 The Peanut is extra-nimble. At only 18" w x 17" d and just 24 lbs, it's light enough to push with a finger.

4 The all-steel construction is powder coated so it's easy to clean and resists cracking and chipping.

5 The clip-on cable sleeve protects cords along the column.

6 Move it effortlessly on the 3" twin wheel rubber casters (2 locking).

The Peanut for Tablets: Three easy ways to mount your tablet!

7 The Peanut for Tablets is just like The Peanut, except that it has an extra-long column with a tilting mount so you can position a tablet at eye-level, the shelf is smaller (18" w x 11" d), and it's slightly heavier at 27 lbs.

8 You have three options to secure your tablet with the tilting tablet mount, VESA plate, "easel" and top-grip (all included).

9 **OPTION 1:** Hard-mount your tablet case directly to the VESA plate.

10 **OPTION 2:** Add the 12"-wide easel to the VESA mount and place your tablet on the cart for quick data entry.

11 **OPTION 3:** Add the top grip to the easel to hold the top of your tablet so you have extra stability if you move the cart around a lot.
