- First asymmetrical lumbar adjustment

BUSINESS CHALLENGE
Enhance reliability of Haworth servers to ensure performance for 5,000 global users.

BUSINESS RESULT
Immediate improvement in performance, resulting in faster access to information and inquiries resulting in improved internal and external customer satisfaction.

CLIENT VISION
5000 Users and a Global Customer Base Can’t Wait, so i3 Business Solutions Brings Immediate Results

When the servers at Haworth Inc. started to become less than completely reliable, the resulting problems were almost too numerous to mention. “Our customers were getting some intermittent-to-poor responses from us, and everyone in the company was affected,” said Mike Podjan, Haworth’s manager of IT servers, including HP/Unix, the company mainframe, storage environments and DBA functions. “On a given day, it could be as many as 5,000 users, and we need to be responsive to customers on a global basis.” Haworth needed a partner that was resourceful, innovative and responsive enough to understand the challenges and implement the right solutions. It turned to i3 Business Solutions, whose team was led by Paul Lastas. The resulting improvement happened almost instantly. “Within a couple of weeks, they had improved things,” Podjan said. “It helped us immediately to be able to improve the performance to our customers on the mainframe.”

I3 SOLUTION
Haworth Engages i3 to Provide a Variety of Services, Including:
- System z CPU, disk and memory performance analysis
- System z DB2 database and application optimization helped and prevent spending millions on additional hardware
- System z z/OS Operating System and System Tools software project management and execution
- System z Managed Technology Services outsourcing of zSeries System Programming services (OS technical maintenance) while Haworth transitions their staff to a unified Unix environment.
- pSeries - Unix RS/6000 hardware acquisition assistance for subsidiary company acquisition application transition.

“They come in and help with opportunities for improvement — a very proactive thing, keeping ideas in front of us, because we’re very busy, and if we don’t see issues coming, we can forget about them.”

Mike Podjan / HAWORTH
“It’s been a very good experience,” Podjan said. “Paul Lastas is doing maintenance and other work for us in the mainframe arena on a regular basis, and he has done an excellent job stepping in without a whole lot of training to learn our environment and to be very productive. i3 comes in and helps with opportunities for improvement — a very proactive thing, keeping ideas in front of us, because we’re very busy, and if you don’t see issues coming, you can forget about them.”
