BACHELOR OF EDUCATION AT VICTORIA UNIVERSITY (P-12)

Bachelor of Education (P-12), which allows graduates to teach at any school level. Majors are offered in 16 specialist.

See: www.vu.edu.au/courses/ebed.

WHAT IS MYOTHERAPY?

Myotherapists are specialists in the assessment, treatment and management of nerve, muscle and joint health and can help patients with a variety of sporting and occupational injuries and conditions, and the pain that comes with them. Myotherapy is becoming increasingly recognised for its ability to tackle the growing amount of musculoskeletal pain. It is taught at a number of institutions including RMIT and Chisholm, and at a number of private colleges such as the Southern School of Natural Medicine.

These school holidays RMIT are offering students in years 10, 11 and 12 the opportunity to go behind the scenes at a medical laboratory in one of Melbourne's major hospitals, including the Royal Children's Hospital and Peter MacCallum Cancer Centre.

Students can find out what really happens with blood tests and other areas of pathology, including clinical biochemistry, haematology, blood banking, medical microbiology, virology, and anatomical pathology.

Tours will run from the 3rd - 7th July.

Students will get to see whether a career as a medical scientist might be right for them.

Tours are free, but students must register as places are limited.
