FOR IMMEDIATE RELEASE:

## **XPERTECHS Creates New IT Plan for Greenebaum Enterprises**

**Ellicott City, Maryland – July 2, 2014** – XPERTECHS just announced Greenebaum Enterprises as their newest client. XPERTECHS will now be managing all of Greenebaum’s IT needs through their Managed Services solution, XperCARE.

Greenebaum Enterprises is a privately owned real estate company formed in 1981 and operating in the Baltimore/Washington Metropolitan area. While involved in all property types, their most notable achievement has been in two sectors: office buildings and large scale mixed use developments.

Greenebaum Enterprises is in the process of replacing their existing IT structure in order to increase productivity, provide ease of administration and reduce costs. They have determined XperCARE as the best solution in order to meet their goals. Once the system is fully implemented, XPERTECHS will be able to monitor Greenebaum’s network remotely 24/7 and provide key IT functions such as: help desk, problem remediation, remote backup, patch management, anti-virus/spyware protection, Internet security, and content filtering. Greenebaum Enterprises will also be utilizing Microsoft’s Office 365 cloud solution for document management and collaboration.

“XPERTECHS is thrilled about the new relationship with Greenebaum Enterprises. Our expertise enables us to provide the very best technology support to businesses like Greenebaum. We are looking forward to improving their systems with our market-leading solutions” said Michael Mellott, President at XPERTECHS.
