**FOR IMMEDIATE RELEASE:**

## **XPERTECHS Partners With Panzura To Provide Global Cloud Storage Solutions**

**Ellicott City, Maryland – January 19, 2015** – XPERTECHS, a leading Information Technology and Cloud Solutions firm, announced today that it will now partner with Panzura, a global cloud storage system .

Panzura optimizes enterprise data storage management and distribution in the cloud, making cloud storage simple and secure. By utilizing Panzura’s technologies, XPERTECHS can now offer its customers primary file storage and collaboration across multiple offices as if they were all in the same location. This technology is especially beneficial for Architecture-Engineering-Construction (AEC) companies, where large files and multiple locations is common.

“Providing Panzura’s world-class storage solutions to our customers keeps us on the cutting edge of cloud storage” said Michael Mellott, President at XPERTECHS. “With the increasing importance of data storage, specifically across multiple sites, we knew that partnering with Panzura was a must! By implementing Panzura’s storage system into some of the more robust networks we manage, we can provide our customers assurance that their data will always be available from any location, and will always be secure.”

With Panzura, the cloud not only servers as every tier of storage, it becomes the fabric that enables globally distrusted teams rapid file access and easy collaboration. Panzura delivers one file system across hundreds of offices that allows users to work together as if they were in the same room. XPERTECHS is planning to implement the technology with many of its current and prospective customers throughout the year.

### **About XPERTECHS**

XPERTECHS is a leading Information Technology company offering a full range of services including Microsoft network solutions, LAN and WAN connectivity, Proactive IT Managed Services (XperCARE), Cloud Solutions (CLOUD XPERIENCE), Network Security, and Training.
