FOR IMMEDIATE RELEASE:

XPERTECHS Announces New XperCARE Client, RBS Incorporated

ELLICOTT CITY, MD – December 17, 2016 – XPERTECHS announced today the signing of its newest XperCARE client, Re-Engineered Business Solutions (RBS), Inc. XPERTECHS will provide RBS with World-Class IT support through their XperCARE Managed Services solution.

Founded in 2001, RBS is a Prime Contractor performing Facility Support Services, NAICS 561210, for the U.S. Army Corps of Engineers at eight dam and reservoir lake project sites, as well as three project sites performing flood control and maintaining levees and other structures, and at two U.S. Army Installations (Fort Hamilton, New York and Fort Gillem, Georgia). Their 13 current project sites are located in Arkansas, Georgia, Mississippi, New York, and Virginia. Their corporate headquarters is located in Cocoa, Florida.

XPERTECHS has been supporting RBS with small IT projects for over the past decade, but due to increasing projects and company size, RBS decided it was time to implement a full-time IT support solution. XPERTECHS will design and implement a new Proactive IT support system through its Managed Services package. Once the system is fully implemented, XPERTECHS will be able to monitor RBS's network remotely, 24/7, and provide key IT functions such as: help desk, problem remediation, remote backup, patch management, anti-virus/spyware protection, Internet security, and content filtering.

“We were happy when RBS approached us about implementing a larger-scale IT solution for their organization. RBS and XPERTECHS have had a long relationship and we see RBS' decision to implement XperCARE as only cementing that bond for many more years to come.” said Michael Mellott, President of XPERTECHS.

About XPERTECHS

XPERTECHS is a Microsoft Gold Partner company offering a full range of services including Microsoft network solutions, LAN and WAN connectivity, Proactive IT Managed Services (XperCARE), Cloud Solutions (CLOUD EXPERIENCE), Office 365 Implementations, and Network Security. Their focus is on delivering high quality Networking, Proactive Management, IP Telephony and Internet Solutions that are critical to solving information needs of their clients.

XPERTECHS provides installation and support of networks, servers, workstations, PCs, firewalls, routers, switches and vCIO services. The company renders on-site and remote support through their XperCARE Managed Services offering.
