

FOR IMMEDIATE RELEASE:

XPERTECHS to Provide Upgraded Network and Email to W.A. Chester

Ellicott City, Maryland – December 2010 – XPERTECHS, a leading IT Network Services and Support Partner, has been selected by W.A. Chester, a Pepco Energy Services firm in Lanham, MD, (one of only three specialty contractors performing this work on a national basis) to provide an upgraded network and email server solution. The new system provides W.A. Chester with a bevy of productivity-enhancing features, such as greater mobility and flexible access, decreased inbox overload, increased productivity, simplified compliance and safeguards for sensitive information.

W.A. Chester was growing at a tremendous rate and would soon overrun the capacity of their existing servers and network. In addition, they wanted to increase productivity, provide ease of administration and save money through better communication with field employees. “Since our current systems were beginning to fail, we needed to install state-of-the-art networking and email systems. XPERTECHS was able to demonstrate to us, the potential value of the system and how we could manage and administer the system from anywhere in our organization,” said Marion Herrington, Controller, W.A. Chester, LLC.

“By upgrading to the Microsoft Exchange 2010 platform network, we transformed our communications infrastructure into a healthy, productive work environment while saving us considerable time and money,” concluded Herrington. “The superior performance and growth potential of Microsoft’s solutions combined with XPERTECHS’ experience are unbeatable.”

About XPERTECHS

XPERTECHS is a leading Convergent Technology company offering a full range of services including Microsoft network solutions, LAN and WAN connectivity, Proactive IT Managed Services (Xper**CARE**), IP Telephony, Internet Connectivity, Network Security, and Training.
