

SIP TRUNKING

SMALL BUSINESS PRICING GUIDE 2017

nexVortex small business pricing plans are commonly used for analog line replacement, flat rate outbound calling applications, back-up trunks, and testing. Please contact your business partner or sales@nexVortex.com for pricing for PRI replacement, multi-site, call center, and large applications.

Each nexVortex service plan includes a pool of minutes to be used for outbound calling and inbound calling (DID). Service plans also include a given amount of phone numbers (DID) and a local E911 listing. Additional DID numbers, Toll Free service, and additional features can be ordered for these service plans at any time.

NEED A LARGER PLAN?

nexVortex nV250, nV1000, or mSIP (Managed SIP Trunking) plans may be right for you. Contact your business partner or sales@nexVortex.com.
