

Video Calling with Polycom VVX 500/600 Desk Phones

TRANSFORM YOUR DESK PHONE INTO A PEER-TO-PEER VIDEO CALLING CENTER WITH THE POLYCOM VVX CAMERA AND ELEVATE UNIFIED COMMUNICATIONS

Video Calling does not require a PC, software, or any external videoconferencing solution. Simply plug in a Polycom VVX Camera (sold separately) into the dedicated slot on a Polycom VVX 500/600 desk phone, and dial as usual.

Receiving video calls is just as easy as placing them. With autostart video enabled, simply answer a video call like any other phone call - by picking up the handset. Then open or close the manual camera privacy shutter as needed.

User interface features:

- Physical privacy shutter
- Adjustable tilt control
- Plug-and-Play setup
- Normal, Full, Crop video screen modes
- Local side-by-side, PIP window modes
- Autostart video option
- Anti-flicker compensation
- 2 color/4 state status LED

Solution requires:

- Polycom VVX 500 or VVX 600 desk phone
- Polycom VVX Camera

Note: Polycom VVX 500/600 desk phones are required on both ends of the connection.
