

WAUKESHA COUNTY TECHNICAL COLLEGE

Brief Description: The college needed to add permeable space to its grounds. IRSC helped them achieve that by replacing the existing Service Building roof with a vegetative one.

Solution: The Service Building roof had flat and sloped areas. The existing built-up roof and sloped metal roof system was removed. Structural reinforcement was put in place to handle the weight of the new vegetative roof. The new PVC membrane was applied with the vegetation installed over the new membrane.

Project Specifics: Waukesha County Technical College
Pewaukee, WI
Size: 10,000 square feet
Cost: \$267,489
Owner: Waukesha County Technical College
Contact: Jeff Leverenz
