

Cyber-Security + Protection Checklist

12 ways you can protect your organization from a ransomware attack!

<h3>Security Assessment</h3> <p>It's important to establish a baseline for your network!</p> <p>When was your last assessment?</p> <input type="checkbox"/>	<h3>Spam Email</h3> <p>Secure your email, where most attacks originate! We'll help you choose a service to reduce spam and exposure to attacks.</p> <input type="checkbox"/>	<h3>Passwords</h3> <p>Create security policies like limits on USB file storage and user access, screen timeouts, and 2-factor authentication.</p> <input type="checkbox"/>
<h3>Security Awareness</h3> <p>Train your users! We're happy to help educate your users on email attacks, data security and your policies.</p> <input type="checkbox"/>	<p>—Did you know?— 97% of breaches today could have been prevented!</p>	<h3>Advanced Endpoint Security</h3> <p>Replace outdated anti-virus software with advanced endpoint security to protect against attacks and malware.</p> <input type="checkbox"/>
<h3>Multi-factor Authentication</h3> <p>Use this on your bank, social, website and work profiles whenever possible!</p> <input type="checkbox"/>	<h3>Computer Updates</h3> <p>Keep Microsoft, Adobe and Java products updated for the better security. Let us help automate these critical updates.</p> <input type="checkbox"/>	<h3>Dark Web Research</h3> <p>Let us proactively scan the Dark Web to protect you from being a victim of stolen credentials posted for sale.</p> <input type="checkbox"/>
<h3>Firewall</h3> <p>Detect and prevent intrusions and let our team manage your SIEM by routinely checking the firewall log files!</p> <input type="checkbox"/>	<h3>Encryption</h3> <p>Whenever files are at rest, in motion (like email), and on mobile devices, it's best to encrypt for maximum security.</p> <input type="checkbox"/>	<h3>Backup</h3> <p>Do you have a local, cloud, and monthly offline backup? Have you tested them? If you're not sure, call today!</p> <input type="checkbox"/>
