

Dear Valued Customers,

I wanted to take this time to thank you for choosing ITS as your technology service provider and welcome you as a customer. Our goal is to not simply serve our customers, but to build and maintain lasting relationships with them.

At ITS, we have and always will strive to be our customers one stop shop providing not only telecom, but also infrastructure, computer network, data security and value added services. Over the years we've changed and diversified to meet the forever demanding changes in technology, services and functionality to provide our customers with complete technology solutions for all their business needs through managed services.

ITS is committed to providing you with the best solution for your business technology challenges at a fair price. We will continually evaluate our solutions and update them as technology evolves, but only when the technology advancements are proven to offer the best solution for our customers. We are flexible enough to adapt to new technologies and solutions quickly. Our staff is full of specialists, not generalists, as you will find in larger organizations. This enables us to ensure our customers are always receiving support from an expert.

At ITS we place a high value on the relationships that we establish with our customers. We thank you for the opportunity to service you and are committed to continue to earn your business every day.

Sincerely,

Sharon L. Woods
President & CEO
