

SMALL & MEDIUM BUSINESS

RELIABILITY Feature Brief

Keep Productivity Flowing with NO Downtime

On most days, the Internet and the innumerable systems it powers can be relied on to work well enough. But network failures are inevitable, often caused by way of accidentally cut lines, weather and environment issues, hacking, or other unforeseen issues beyond the control of the service provider. When your connection is down, it means dropped VoIP calls, cancelled transactions, and widespread inconvenience and frustration. Instead of setting everything up and hoping it won't fail, businesses should be able to rely on a system that can respond quickly and gracefully to those inevitable failures.

Bonded Internet™ - Reliability with Failover

We can provide an Internet Failover Service like no other. This unique service allows any business to combine multiple Internet connections (regardless of provider or type) to create reliable Internet connectivity. If one connection suddenly degrades or goes offline, your data will continue to flow to its destination uninterrupted. When the problem connection is fixed, the system will automatically add it back to its pipeline. No special configurations or specialists are required. It's that simple.

Take Your Internet to the Next Level

With robust reliability, businesses can extend their networks to provide customers and users with near 100% uptime. Our Internet Failover Service, gives you the confidence to run your business without the risk of downtime. You'll now have the ability to focus on what matters – your business. This always-on feature lets you create the network that's right for your business and save you time and money in the process.

About Us

We make networking simple and reliable for organizations. KTI is changing the traditional telecom and networking model with our breakthrough Internet-enabled solution that allows Enterprise and SMB customers to simplify their WAN and mitigate the risk of downtime while relieving issues of scale, security, and quality.

Benefits

NETWORK REDUNDANCY

Providing a fail safe for when an internet connection suddenly degrades or drops. Your data continues to flow through the remaining healthy links.

SIMPLE NO-TOUCH

No need to reconfigure network settings. You could be on a VoIP or Video call when a link degrades or dies and you won't even notice.

SAME -IP FAILOVER

Each appliance maintains its own IP address in the event of a failover. No more DNS round-robin time delays.
